Marianus Given Talenta

Full-Stack Web Developer

+6281311277725 | grdgiven4@gmail.com | Bekasi, Indonesia

LinkedIn | Github

Full-Stack Web Developer experienced in building end-to-end web applications, using React.js, Redux Toolkit, and Tailwind CSS on the frontend and Go (Gin), PostgreSQL, Redis, Laravel, and Python (Flask) on the backend. Hands-on experience integrating payment gateways (Xendit, Midtrans) and led a 4-person team as Project Manager on a digital wallet application. Highly motivated to learn and adapt to modern web technologies, with strong communication, teamwork, and problem-solving skills. Eager to collaborate with a professional team to deliver robust and impactful digital solutions.

Project Experiences

Digital Wallet Web Application (Team Project) **Oct 2026**

Frontend: Github Backend: Github

- Led a team of 4 as Project Manager to deliver a full-stack e-wallet application, coordinating tasks between backend and frontend developers and managing collaboration through GitHub feature branches and pull requests.
- Developed the money transfer feature with PIN verification, using PostgreSQL database transactions to keep user balances consistent.
- Integrated the Xendit payment gateway for wallet top-ups, including a webhook endpoint that processes payment confirmations automatically.
- Implemented OTP verification and the forgot-password and reset-password flow to secure account access and recovery.
- Containerized the frontend and backend with Docker and Docker Compose, and built GitHub Actions CI pipelines for both services.

Eventhub (FullStack) **Aug 2026 - Oct 2026**

Frontend: Github Backend: Github

- Built a full-stack event and community platform with a React.js + Tailwind CSS frontend and a Go (Gin) REST API.
- Implemented JWT authentication with role-based access control (RBAC) and Redis-backed token blacklisting for secure logout.
- Delivered end-to-end features including authentication, profile management, notifications, testimonials, and role-specific organizer and admin dashboards.
- Dockerized both service and automated image builds with GitHub Actions to GitHub Container Registry.
- Designed a normalized PostgreSQL database with relational modeling in DBML, including many-to-many relations and data integrity constraints.

Digital Canteen Ordering (FullStack) **Aug 2025 - Oct 2025**

Github

- Built a full-stack digital canteen ordering platform using React 18 with TypeScript for the frontend and Python Flask for the backend
- Integrated the Midtrans payment gateway to enable secure, real-time digital payments for student orders
- Implemented role-based access control (RBAC) with JWT authentication for Customer, Cashier, and Owner roles
- Designed a real-time order tracking system with status updates from pending to completed
- Developed a sales analytics dashboard with revenue trends, popular menu items, and PDF report export using ReportLab

Library Management System (FullStack) **Sept 2024 - Dec 2024**

Github

- Built a full-stack library management web application using Laravel 11, MySQL, Blade templates, and Bootstrap 5
- Implemented an automated loan tracking system with due-date calculation and book renewal functionality
- Designed a fine calculation module with real-time payment status tracking for overdue returns
- Developed a book inventory and catalog system with live availability status and member database management
- Generated PDF transaction and statistics reports using DomPDF, with SweetAlert2 for interactive UI notifications

Work Experiences

Universitas Telkom Bandung - Bandung, Indonesia **Aug 2025 - Oct 2025**
SEO Student Intern

- Executed an SEO strategy for the Master of Forensic Science program website to increase its organic search visibility over a 3-month internship.
- Wrote and published articles on the program website, targeting high-traffic search keywords identified through keyword research.
- Optimized on-page SEO by crafting meta titles and meta descriptions for every published article.
- Built off-page authority by acquiring backlinks and publishing guest posts on external websites.
- Monitored SEO performance using SimilarWeb, Ubersuggest, and Ahrefs to track traffic, keyword rankings, and backlink growth.

Education

Koda Tech Academy - Bogor, Indonesia **Jul 2026 - Oct 2026**

Fullstack Web Developer

- Learnt front-end development practices: React Js, Redux Toolkit, Tailwind CSS
- Learnt back-end development practices: Golang, Gin-Gonic, PostgreSQL, Redis
- Basic DevOps practices: Working with WSL, Docker, and SSH for local deployment

SMK Telekomunikasi Telesandi Bekasi **2023 – 2026**

Software engineering

SKILL

Frontend Development – HTML, CSS, React.js, Redux, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), Typescript, Blade Template, Responsive Design, Vite
Backend Development – Golang, Gin, PHP, Laravel, Python, Flask , Clean Architecture, Role-Based Access Control (RBAC), Payment Gateway Integration, Webhooks, Database Integration
Database – PostgreSQL, MySQL, Redis, Database Transactions, Database Design, SQL Optimization
DevOps & Deployment – Docker, Docker Compose, CI/CD (GitHub Actions), Container Registry, Nginx, Linux CLI
API Design – RESTful API
Version Control – Git, GitHub, Git Flow
Project Management – Agile/Scrum, Trello, Technical Documentation
Cloud & Hosting – Vercel
Security & Best Practices – Input Validation, Rate Limit, HTTPS, JWT, CORS
